Art Unit: 3673

It appears that claim 1, drawn to a bed including a "patient monitoring system" is improperly presented as a "divisional" application of 09/821, 552, which application does not have any antecedent basis for a "patient monitoring system". It appears that claim 1 should be deleted, and presented in a separated application.

This application contains claims directed to the following patentably distinct species of the claimed invention: The species of figures 12, 13; and the species of figures 18-20.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 7 and 17 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record

Art Unit: 3673

showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Mr. Cernyar on 3/18/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Paragraph [0001] on page 1 needs to be revised (and updated with patent numbers) since the pending application is not a "division" of 09/821,552, since the specifications are not identical. Note that claims 7 and 17 set forth "or data" in lines 4, which is not disclosed in 09/821, 552. Mr. Cernyar indicated that in response to this office action he will revise and update paragraph [0001] appropriately, and insert clear antecedent basis for all claimed subject matter and will consider amending the claims, and providing new declarations as appropriate.

In view of the difficulty of understanding, due to the very poor quality of the drawings of Irish application no S2001/0589, applicant is urged to comment on its relevance to the claims of the invention.

Any inquiry concerning this communication should be directed to Alex Grosz at telephone number (703) 308-2498.
